## NZ Bonds Fund

### Fund update for the quarter ended 30 September 2017

This fund update was first made publicly available on 24 October 2017.

### What is the purpose of this update?

This document tells you how the NZ Bonds Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The NZ Bonds Fund is designed to provide a return (after tax, fees and other expenses) that reflects the after-tax return on the New Zealand bond market.

Total value of the fund: \$128,225,442

The date the fund started: 28 October 2016

### What are the risks of investing?

#### Risk indicator for the NZ Bonds Fund<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2017.

While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

### Other specific risks

There are other risks that may increase the risk to returns for investors, which are not reflected in the risk indicator. These risks include investment management risk. In particular, while SuperLife Invest's philosophy is that a passive approach to investing will deliver better long-term results, we make some active management decisions. There is a risk that this may result in the fund achieving a return that is lower than its investment objective.

See the "Other Information – Risks" document on the offer register at

[www.business.govt.nz/disclose](http://www.business.govt.nz/disclose) for further information about the risks of investing in SuperLife Invest.

### How has the fund performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	Not applicable
<b>Annual return</b> (after deductions for charges but before tax)	Not applicable
<b>Market index annual return</b> (reflects no deduction for charges and tax)	0.25%

The market index annual return is based on the annual return of the S&P/NZX NZ Government Bond Index. Additional information about the market index is available on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

## What fees are investors charged?

Investors in the NZ Bonds Fund are charged fund charges. These are as follows:

	% per annum of fund's net asset value
<b>Total fund charges (estimate)</b>	0.44% <sup>2</sup>

Which are made up of:

<b>Total management and administration charges (estimate)</b>	0.44% <sup>2</sup>
---	--------------------

Including:

Manager's basic fee	0.25%
Other management and administration charges (estimate)	0.19% <sup>2</sup>

<b>Total performance-based fees</b>	0.00%
-------------------------------------	-------

Other charges	Dollar amount per investor
---------------	----------------------------

Administration fee	\$12 per annum
--------------------	----------------

Paper statements fee	\$18 per annum <sup>3</sup>
----------------------	-----------------------------

Investors will not be charged individual action fees for specific actions or decisions. See the "Other Information – Fees" document on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose) for more information about the fees investors are charged.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Jess had \$10,000 in the fund on 28 October 2016 and did not make any further contributions. On 30 September 2017, Jess received a return after fund charges were deducted of \$248 (that is 2.48% of her initial \$10,000). Jess paid other charges of \$11 (Jess received statements and other SuperLife communications electronically and was not charged the paper statements fee). This gives Jess a total return after tax of \$237 for the 11 months and 3 days.

## What does the fund invest in?

### Actual investment mix

This shows the types of assets that the fund invests in.

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Asset Category	Target asset mix

## Further information

You can also obtain this information, the Product Disclosure Statement for SuperLife Invest, and some additional information, from the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

## Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 4 years and 1 month of market index returns.
- 2 Estimates have been used to calculate the other management and administration charges. These estimates are based on our experience in respect of the other SuperLife managed investment schemes we manage and assume that the fund's actual investment mix will be consistent with the target investment mix set out in this fund update.
- 3 You will only be charged this fee if you choose to receive statements and other SuperLife communications in paper form.
