

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	8.71%
Annual return (after deductions for charges but before tax)	10.23%
Market index annual return (reflects no deduction for charges and tax)	11.94%

The market index annual return is based on the annual return of the S&P/ASX Dividend Opportunities Index (NZD). Additional information about the market index is available on the offer register at www.business.govt.nz/disclose.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2017.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Australian Dividend ETF Fund are charged fund charges. In the year to 31 March 2017 these were:

	% per annum of fund's net asset value
--	---------------------------------------

Total fund charges	0.49% ²
---------------------------	--------------------

Which are made up of:

Total management and administration charges	0.49% ²
--	--------------------

Including:

Manager's basic fee	0.27%
Other management and administration charges	0.22%
Total performance-based fees	0.00%

Other charges Dollar amount per investor

Administration fee	\$60 per annum
--------------------	----------------

Investors may also be charged individual action fees for specific actions or decisions (for example, for transferring money into the scheme from a UK pension scheme). See the "Other Information – Fees" document on the offer register at www.business.govt.nz/disclose for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$871 (that is 8.71% of her initial \$10,000). Jess paid other charges of \$60. This gives Jess a total return after tax of \$811 for the year.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Further information

You can also obtain this information, the Product Disclosure Statement for the SuperLife UK pension transfer scheme, and some additional information, from the offer register at www.business.govt.nz/disclose.

Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 3 years of market index returns.
- 2 On 9 November 2016, the total management and administration charges changed to 0.54% per annum. As a result, the total fund charges will be different in the year to 31 March 2018.
