SuperLife Age Steps - Age 20 ¹

Investment update for the quarter ended 30 September 2022

This investment update was first made publicly available on 31 October 2022.

What is the purpose of this update?

This document tells you how SuperLife Age Steps - Age 20 (the stage) has performed and what fees were charged. The document will help you to compare the stage with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this stage

SuperLife Age Steps automatically sets the proportion of your investment in income and growth assets based on your age. As you get older, the proportion of your investment in more volatile growth assets will be reduced, lowering the expected size of the ups and downs in the value of your investment. This option may be suitable if you are saving for retirement (assumed to be age 65), and assumes you will continue to invest your savings and spend them over your retirement period.

Your SuperLife Age Steps - Age 20 investment will be allocated 5% to income assets and 95% to growth assets.
