

What fees are investors charged?

Investors in the Overseas Bonds Fund are charged fund charges. These are as follows:

	% per annum of fund's net asset value
Total fund charges (estimate)	0.49% ²

Which are made up of:

Total management and administration charges (estimate)	0.49% ²
---	--------------------

Including:

Manager's basic fee	0.25%
Other management and administration charges (estimate)	0.24% ²

Total performance-based fees	0.00%
-------------------------------------	-------

Other charges	Dollar amount per investor
---------------	----------------------------

Administration fee	\$12 per annum
--------------------	----------------

Paper statements fee	\$18 per annum ³
----------------------	-----------------------------

Investors will not be charged individual action fees for specific actions or decisions. See the "Other Information – Fees" document on the offer register at www.business.govt.nz/disclose for more information about the fees investors are charged.

Small differences in fees and charges can have a big impact on your investment over the long term.

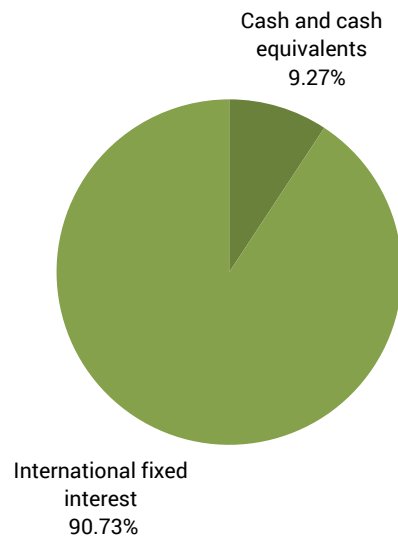

Example of how this applies to an investor

Jess had \$10,000 in the fund on 28 October 2016 and did not make any further contributions. On 30 September 2017, Jess received a return after fund charges were deducted of \$232 (that is 2.32% of her initial \$10,000). Jess paid other charges of \$11 (Jess received statements and other SuperLife communications electronically and was not charged the paper statements fee). This gives Jess a total return after tax of \$221 for the 11 months and 3 days.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Asset Category	Target asset mix

Further information

You can also obtain this information, the Product Disclosure Statement for SuperLife Invest, and some additional information, from the offer register at www.business.govt.nz/disclose.

Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 4 years and 1 month of market index returns.
- 2 Estimates have been used to calculate the other management and administration charges. These estimates are based on our experience in respect of the other SuperLife managed investment schemes we manage and assume that the fund's actual investment mix will be consistent with the target investment mix set out in this fund update.
- 3 You will only be charged this fee if you choose to receive statements and other SuperLife communications in paper form.
