

SuperLife Invest

UK Cash Fund

Fund update for the quarter ended 31 December 2019

This fund update was first made publicly available on 13 February 2020.

What is the purpose of this update?

This document tells you how the UK Cash Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The UK Cash Fund invests in UK cash and cash equivalent assets. Designed to provide a return (after tax, fees and other expenses) that reflects the after-tax return on the UK cash market.

Total value of the fund: \$9,116,853
 The date the fund started: 28 October 2016

What are the risks of investing?

Risk indicator for the UK Cash Fund¹

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the 'Other Material Information' document on the offer register at www.disclose-register.companiesoffice.govt.nz for further information about the risks of investing in SuperLife Invest.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	1.97%
Annual return (after deductions for charges but before tax)	2.61%
Market index annual return (reflects no deduction for charges and tax)	3.44%

The market index annual return is based on the annual return of the 3-month UK treasury bill rate (converted to the New Zealand dollar). Additional information about the market index is available in the 'Other Material Information' document on the offer register at www.disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2019.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the UK Cash Fund are charged fund charges. In the year to 31 March 2019 these were:

	% per annum of fund's net asset value
Total fund charges	0.39%
Which are made up of:	
Total management and administration charges	0.39%
Including:	
Manager's basic fee	0.36%
Other management and administration charges	0.03%
Other charges	Dollar amount per investor
Administration fee	\$12 per annum

There are other risks that may increase the risk to returns for investors, which are not reflected in the risk indicator. These risks include investment management risk. In particular, while SuperLife Invest's philosophy is that a passive approach to investing will deliver better long-term results, we make some active management decisions. There is a risk that this may result in the fund achieving a return that is lower than its investment objective.

See the 'Other Material Information' document on the offer register at www.disclose-register.companiesoffice.govt.nz for further information about the risks of investing in SuperLife Invest.

Small differences in fees and charges can have a big impact on your investment over the long term.

GST is included in the fund charges set out above.

Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$197 (that is 1.97% of her initial \$10,000). Jess paid other charges of \$12. This gives Jess a total return after tax of \$185 for the year.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

Asset Category	Target asset mix
Cash and cash equivalents	100.00%

Further information

You can also obtain this information, the Product Disclosure Statement for SuperLife Invest, and some additional information, from the offer register at www.disclose-register.companiesoffice.govt.nz.

Material changes

There have been no material changes to the nature of SuperLife Invest, the investment objectives and strategy of the fund, or the management of the scheme over the quarter ended 31 December 2019.

Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 1 year and 10 months of market index returns.
- 2 The top 10 investments listed in the table exclude current assets and current liabilities, and as a result do not sum to 100%.
