### What are the risks of investing?

#### Risk indicator for the Total World (NZD Hedged) Fund<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [sorted.org.nz/tools/investor-kickstarter](http://sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2020. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the 'Other Material Information' document on the offer register at [disclose-register.companiesoffice.govt.nz](http://disclose-register.companiesoffice.govt.nz) for further information about the risks of investing in the SuperLife KiwiSaver scheme.

### How has the fund performed?

|  | Past year      |
|--|----------------|
| <b>Annual return</b><br>(after deductions for charges and tax)                   | Not applicable |
| <b>Annual return</b><br>(after deductions for charges but before tax)            | Not applicable |
| <b>Market index annual return</b><br>(reflects no deduction for charges and tax) | 0.00%          |

The market index annual return is based on the annual return of the FTSE Global All Cap Index (100% hedged to the New Zealand dollar). Additional information about the market index is available in the 'Other Material Information' document on the offer register at [disclose-register.companiesoffice.govt.nz](http://disclose-register.companiesoffice.govt.nz).

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

### What fees are investors charged?

Investors in the Total World (NZD Hedged) Fund are charged fund charges. These are as follows:

|   | % per annum of fund's net asset value |
|---|---------------------------------------|
| <b>Total fund charges (estimate)</b>                          | 0.58%                                 |
| Which are made up of:   |                                       |
| <b>Total management and administration charges (estimate)</b> | 0.58%                                 |
| Including:  |                                       |
| Manager's basic fee   | 0.57%                                 |
| Other management and administration charges (estimate)        | 0.01%                                 |
| <b>Other charges</b>  | <b>Dollar amount per investor</b>     |
| Administration fee  | \$30 per annum <sup>2</sup>           |

Investors may also be charged individual action fees for specific actions or decisions (for example, if an investor has a financial adviser and has agreed to pay a fee to the adviser for providing financial advice). See the Product Disclosure Statement for SuperLife Invest for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

The fees set out above include GST where applicable.

### Example of how this applies to an investor

Jess had \$10,000 in the fund on 15 July 2020 and did not make any further contributions. On 30 September 2020, Jess received a return after fund charges were deducted of \$351 (that is 3.51% of her initial \$10,000). Jess paid other charges of \$5 (Jess received statements and other SuperLife communications electronically and was not charged the paper statements fee). This gives Jess a total gain after tax of \$346 for the 2 months and 15 days.

### Material changes

There have been no material changes to the nature of the SuperLife KiwiSaver scheme, the investment objectives and strategy of the fund, or the management of the scheme over the quarter ended 30 September 2020.

### Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 4 years and 10 months of market index returns.
- 2 The administration fee is stated net of an income tax deduction applied in calculating your PIE tax payable (the deduction is paid to us). The relevant gross fee is calculated using your PIR.
- 3 The top 10 investments listed in the table exclude current assets and current liabilities, and as a result do not sum to 100%.
