

# Investment Update

## SuperLife UK pension transfer scheme

### SuperLife<sup>Age Steps</sup> - Age 20

For the quarter ended 31 December 2016

This Investment Update was first made publicly available on 13 February 2017.

### What is the purpose of this update?

This document tells you how SuperLife<sup>Age Steps</sup> - Age 20 has performed and what fees were charged. The document will help you to compare the stage with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this stage

SuperLife<sup>Age Steps</sup> automatically adjusts the proportion of your investment in income and growth assets depending on your age. As you get older, the proportion of your investment in higher risk growth assets will be reduced, lowering the expected size of the ups and downs in the value of your investment. This option may be suitable if you are saving for retirement (assumed to be age 65), and assumes you will continue to invest your savings and spend them over your retirement period.

Your SuperLife<sup>Age Steps</sup> - Age 20 investment will be allocated 4% to SuperLife<sup>Income</sup> and 96% to SuperLife<sup>100</sup> (which are managed funds this stage invests in).

Total value of the stage:	-
Number of investors in the stage:	-
The date the stage started:	15 September 2013

### What are the risks of investing?

#### Risk indicator for SuperLife<sup>Age Steps</sup> - Age 20 <sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the stage's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://www.sorted.org.nz/tools/investor-kickstarter>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a stage’s future performance. The risk indicator is based on the returns data for 5 years to 31 December 2016. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future investment updates.

See the Product Disclosure Statement for the SuperLife UK pension transfer scheme (**PDS**) for more information about the risks associated with investing in this stage.

### How has the stage performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	7.52%
<b>Annual return</b> (after deductions for charges but before tax)	8.75%
<b>Market index annual return</b> (reflects no deduction for charges and tax)	7.80%

The market index annual return is based on the annual return for the composite index of the underlying funds. It is made up of the indices used to measure the performance of the assets that the life cycle stage invests in. Additional information about the market index is available on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose)

### Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the stage started. The last bar shows the average annual return since the stage started, up to 31 December 2016.

**Important:** This does not tell you how the stage will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

### What fees are investors charged?

Investors in SuperLife<sup>Age Steps</sup> - Age 20 are charged fund charges. In the year to 31 March 2016 these were:

	% per annum of stage's net asset value
<b>Total fund charges</b>	0.56%
Which are made up of:	
<b>Total management and administration charges</b>	0.56%
Including:	
Manager's basic fee	0.48%
Other management and administration charges	0.08%
<b>Total performance-based fees</b>	0.00%
<b>Other charges</b>	Dollar amount per investor
Administration fee	\$60 per annum

\* From 9 November 2016, the total fund charges changed to 0.63% per annum of the stage's net asset value.

The Scheme has an entry fee. This fee is to meet the costs of transferring your money into the Scheme from a UK pension scheme. It will be calculated as our estimate of those costs and will be agreed with you before we start the transfer process.

See the "Other Information – Fees" document on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose) for further information about the fees you will be charged for investing in the SuperLife UK pension transfer scheme.

Small differences in fees and charges can have a big impact on your investment over the long term.

### Example of how this applies to an investor

Jess had \$10,000 in the stage at the start of the year and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$752 (that is 7.52% of her initial \$10,000). Jess paid other charges of \$60. This gives Jess a total return after tax of \$692 for the year.

### Further information

You can also obtain this information, the PDS, and some additional information, from the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose)

### Notes

- 1 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the stage has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the stage. The risk indicator for the stage uses 1 year and 8 months of market index returns.
