

# SuperLife UK pension transfer scheme

## NZ Top 10 ETF Fund <sup>1</sup>

This fund update replaces the fund update for the quarter ended 31 December 2017 that was first made publicly available on 26 January 2018. Note 3 has been updated to refer to 7 December 2017 changes to the total management and administration charges.

### Fund update for the quarter ended 31 December 2017

This fund update was first made publicly available on 5 February 2018.

### What is the purpose 5 February 2018e?

This document tells you how the NZ Top 10 ETF Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The NZ Top 10 ETF Fund invests in the Smartshares Exchange Traded Funds' NZ Top 10 Fund.

Total value of the fund: -  
 Number of investors in the fund: -  
 The date the fund started: 21 September 2015

### What are the risks of investing?

#### Risk indicator for NZ Top 10 ETF Fund <sup>2</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

### Other specific risks

There are other risks that may increase the risk to returns for investors, which are not reflected in the risk indicator. These risks include underlying fund tracking risk. In particular, the fund invests in an exchange traded fund, which is designed to track the return on a specific index. Tracking difference may occur when the weighting of each of the financial products included in the index changes, and the fund that tracks the index is not able to exactly match that change. There is a risk that this may result in the fund achieving a return that is lower than the index being tracked by the fund.

There is also a risk that changes to the UK's rules for recognised overseas pension scheme (**ROPS**) limit your ability to withdraw your investments or affect the UK tax you pay on your investment. We will not be liable for any loss you may suffer if this happens.

See the 'Other Information' document on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose) for further information about the risks of investing in the SuperLife UK pension transfer scheme.

## How has the fund performed?

|  | Past year |
|--|-----------|
| <b>Annual return</b><br>(after deductions for charges and tax)                   | 12.81%    |
| <b>Annual return</b><br>(after deductions for charges but before tax)            | 14.34%    |
| <b>Market index annual return</b><br>(reflects no deduction for charges and tax) | 14.43%    |

The market index annual return is based on the annual return of the S&P/NZX 10 Index. Additional information about the market index is available in the 'Other Information' document on the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

## Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2017.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the NZ Top 10 ETF Fund are charged fund charges. In the year to 31 March 2017 these were:

|                           | % per annum of fund's net asset value |
|---------------------------|---------------------------------------|
| <b>Total fund charges</b> | 0.49% <sup>3</sup>                    |

Which are made up of:

|  |                    |
|--|--------------------|
| <b>Total management and administration charges</b> | 0.49% <sup>3</sup> |
|--|--------------------|

Including:

|                     |       |
|---------------------|-------|
| Manager's basic fee | 0.27% |
|---------------------|-------|

|   |       |
|---|-------|
| Other management and administration charges | 0.22% |
|---|-------|

|                                     |       |
|-------------------------------------|-------|
| <b>Total performance-based fees</b> | 0.00% |
|-------------------------------------|-------|

| Other charges | Dollar amount per investor |
|---------------|----------------------------|
|---------------|----------------------------|

|                    |                |
|--------------------|----------------|
| Administration fee | \$60 per annum |
|--------------------|----------------|

Investors may also be charged individual action fees for specific actions or decisions (for example, for transferring money into the scheme from a UK pension scheme). See the Product Disclosure Statement for the SuperLife UK pension transfer scheme for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$1,281 (that is 12.81% of her initial \$10,000). Jess paid other charges of \$60. This gives Jess a total return after tax of \$1,221 for the year.

## What does the fund invest in?

### Actual investment mix

This shows the types of assets that the fund invests in.

### Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

| Asset Category               | Target asset mix |
|------------------------------|------------------|
| Cash and cash equivalents    | -                |
| New Zealand fixed interest   | -                |
| International fixed interest | -                |
| Australasian equities        | 100.00%          |
| International equities       | -                |
| Listed property              | -                |
| Unlisted property            | -                |
| Commodities                  | -                |
| Other                        | -                |

### Top ten investments

| Name                                | % of fund's net asset value | Type                  | Country     | Credit rating (if applicable) |
|-------------------------------------|-----------------------------|-----------------------|-------------|-------------------------------|
| Fisher & Paykel Healthcare Corp Ltd | 16.09%                      | Australasian equities | New Zealand |                               |
| Spark New Zealand Ltd               | 13.09%                      | Australasian equities | New Zealand |                               |
| Auckland International Airport Ltd  | 11.90%                      | Australasian equities | New Zealand |                               |
| A2 Milk Company Ltd                 | 11.58%                      | Australasian equities | New Zealand |                               |
| Fletcher Building Ltd               | 10.41%                      | Australasian equities | New Zealand |                               |
| Ryman Healthcare Ltd                | 9.68%                       | Australasian equities | New Zealand |                               |
| Contact Energy Ltd                  | 7.82%                       | Australasian equities | New Zealand |                               |
| Meridian Energy Ltd                 | 6.93%                       | Australasian equities | New Zealand |                               |
| Z Energy Ltd                        | 6.02%                       | Australasian equities | New Zealand |                               |
| SKYCITY Entertainment Group Ltd     | 5.50%                       | Australasian equities | New Zealand |                               |

The top 10 investments make up 99.02% of the fund's net asset value.

## Currency hedging

Not applicable.

## Key personnel

This shows the directors and employees who have the most influence on the investment decisions of the fund:

| Name                     | Current position                         | Time in current position | Previous or other positions           | Time in previous / other position |
|--------------------------|--|--------------------------|---------------------------------------|-----------------------------------|
| Paul James Baldwin       | Director                                 | 1 year                   | Head of NZX Wealth Technologies - NZX | 1 year and 5 months               |

## Further information

You can also obtain this information, the Product Disclosure Statement for the SuperLife UK pension transfer scheme, and some additional information, from the offer register at [www.business.govt.nz/disclose](http://www.business.govt.nz/disclose).

## Notes

- 1 The NZ Top 10 ETF Fund does not currently have any investors. The information in this document sets out our estimates as to how the NZ Top 10 ETF Fund would have performed and what fees would have been charged if it had investors. These estimates are based on our experience in respect of the NZ Top 10 ETF Fund in the other SuperLife managed investment schemes.
- 2 Market index returns (as well as actual returns) have been used to complete the risk indicator, as the fund has not been in existence for 5 years. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. The risk indicator for the fund uses 2 years and 9 months of market index returns.
- 3 On 7 December 2017, the total management and administration charges changed to 0.60% per annum. As a result, the total fund charges will be different in the year to 31 March 2018.
