## Global Property Fund

### Fund update for the quarter ended 30 June 2019

This fund update was first made publicly available on 26 July 2019.

### What is the purpose of this update?

This document tells you how the Global Property Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The Global Property Fund is designed to provide a return (after tax, fees and other expenses) that reflects the after-tax return on New Zealand and international property markets.

|                                  |              |
|----------------------------------|--------------|
| Total value of the fund:         | \$1,088,903  |
| Number of investors in the fund: | 38           |
| The date the fund started:       | 24 July 2012 |

### What are the risks of investing?

#### Risk indicator for the Global Property Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

### How has the fund performed?

|  | Average over past 5 years | Past year |
|--|---------------------------|-----------|
| <b>Annual return</b><br>(after deductions for charges and tax)                   | 10.45%                    | 14.22%    |
| <b>Annual return</b><br>(after deductions for charges but before tax)            | 11.60%                    | 16.67%    |
| <b>Market index annual return</b><br>(reflects no deduction for charges and tax) | 11.21%                    | 15.57%    |

The market index annual return is based on the annual return of the weighted average annual return of the market indices used to measure the performance of the assets that the fund invests in. Additional information about the market index is available in the 'Other Material Information' document on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

#### Other specific risks

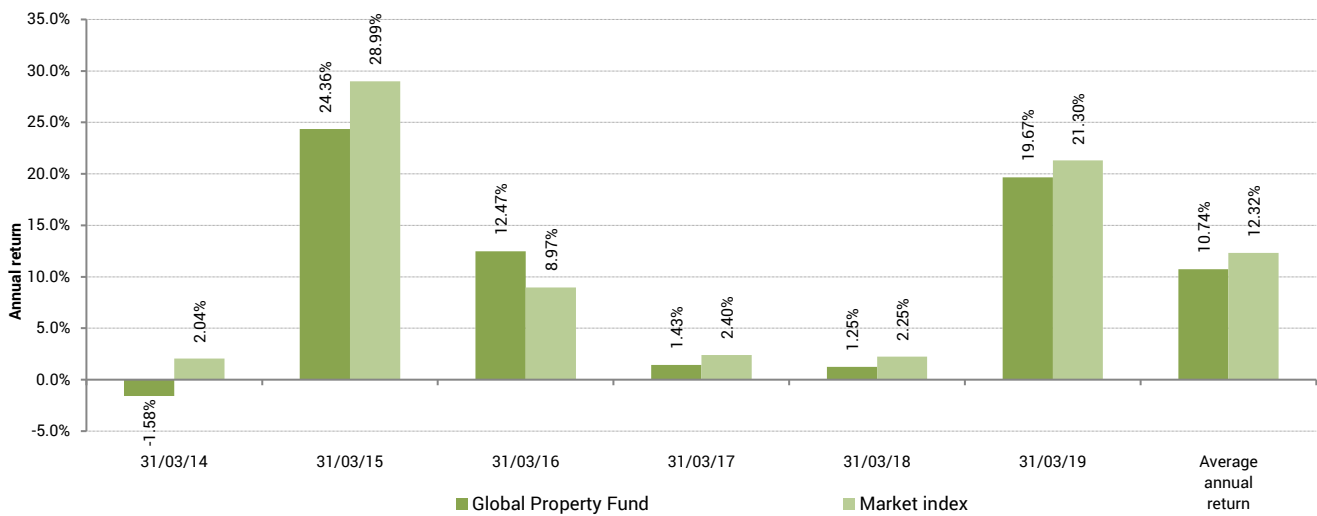

There are other risks that may increase the risk to returns for investors, which are not reflected in the risk indicator. These risks include the risk that changes to the UK's rules for recognised overseas pension schemes (**ROPS**) limit your ability to withdraw your investments or affect the UK tax you pay on your investment. We will not be liable for any loss you may suffer if this happens.

There is also investment management risk. In particular, while the SuperLife UK pension transfer scheme's philosophy is that a passive approach to investing will deliver better long-term results, we make some active management decisions. There is a risk that this may result in the fund achieving a return that is lower than its investment objective.

See the 'Other Material Information' document on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) for further information about the risks of investing in the SuperLife UK pension transfer scheme.

## Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2019.

**Important:** This does not tell you how the fund will perform in the future.

## What fees are investors charged?

Investors in the Global Property Fund are charged fund charges. In the year to 31 March 2019 these were:

|  | % per annum of fund's net asset value |
|--|---------------------------------------|
| <b>Total fund charges</b>                          | 0.59%                                 |
| Which are made up of:                              |                                       |
| <b>Total management and administration charges</b> | 0.59%                                 |
| Including:   |                                       |
| Manager's basic fee                                | 0.41%                                 |
| Other management and administration charges        | 0.18%                                 |
| <b>Other charges</b>                               | <b>Dollar amount per investor</b>     |
| Administration fee                                 | \$60 per annum                        |

Investors may also be charged individual action fees for specific actions or decisions (for example, for transferring money into the scheme from a UK pension scheme). See the Product Disclosure Statement for the SuperLife UK pension transfer scheme for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

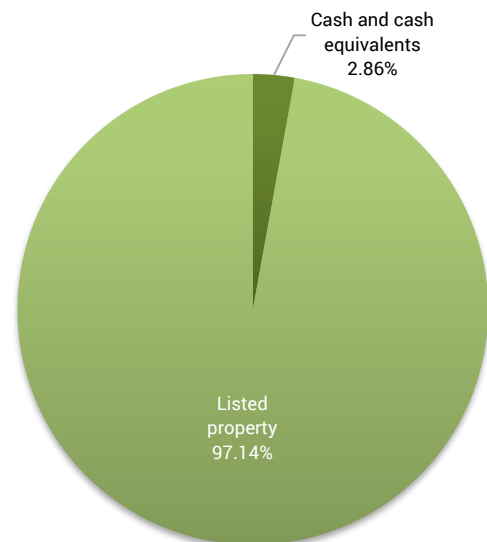

## Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$1,422 (that is 14.22% of her initial \$10,000). Jess paid other charges of \$60. This gives Jess a total return after tax of \$1,362 for the year.
