

SuperLife UK pension transfer scheme

Australian Shares Fund

Fund update for the quarter ended 31 December 2020

This fund update was first made publicly available on 16 February 2021.

What is the purpose of this update?

This document tells you how the Australian Shares Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Invests in Australian shares and designed to reflect the return (before tax, fees and other expenses) on the Australian share market.

Total value of the fund:	\$713,407
Number of investors in the fund:	32
The date the fund started:	24 July 2012

What are the risks of investing?

Risk indicator for the Australian Shares Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	7.28%	4.66%
Annual return (after deductions for charges but before tax)	8.65%	5.49%
Market index annual return (reflects no deduction for charges and tax)	8.77%	2.09%

The market index annual return is based on the annual return of the S&P/ASX 200 Index (75% hedged to the New Zealand dollar). Additional information about the market index is available in the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

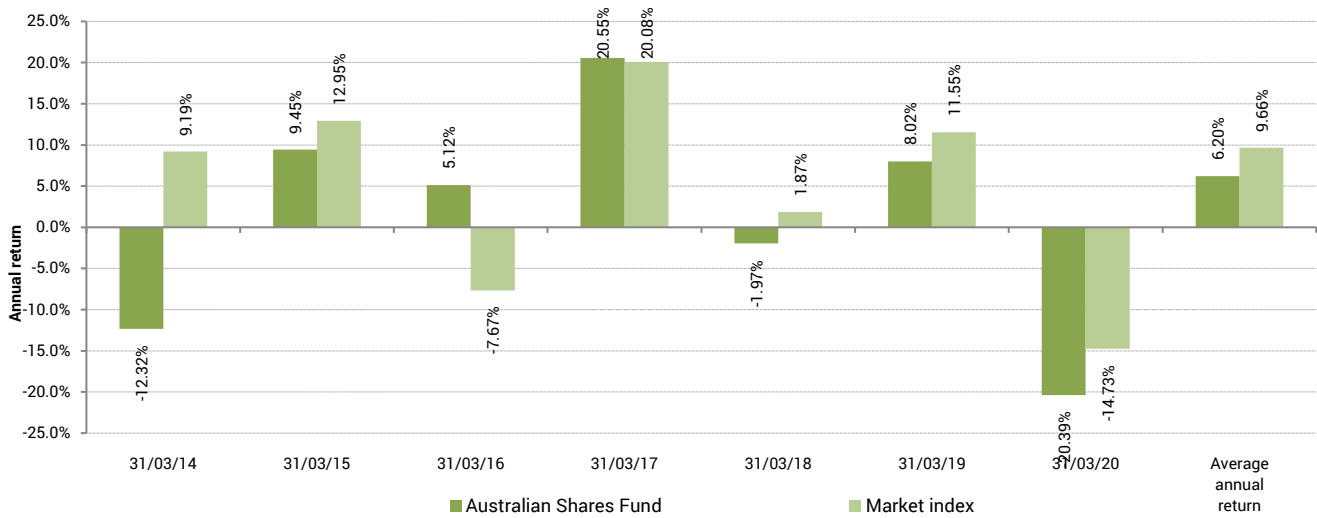

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2020. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

There are other risks that may increase the risk to returns for investors, which are not reflected in the risk indicator. These risks include **ROPS** risk, which is the risk that changes to the UK's rules for recognised overseas pension schemes (ROPS) limit your ability to withdraw your investments or affect the UK tax you pay on your investment. We will not be liable for any loss you may suffer if this happens.

See the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz for further information about the risks of investing in the SuperLife UK pension transfer scheme.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2020.

Important: This does not tell you how the fund will perform in the future.

What fees are investors charged?

Investors in the Australian Shares Fund are charged fund charges. In the year to 31 March 2020 these were:

	% per annum of fund's net asset value
Total fund charges	0.60%
Which are made up of:	
Total management and administration charges	0.60%
Including:	
Manager's basic fee	0.59%
Other management and administration charges	0.01% ¹
Other charges	Dollar amount per investor
Administration fee	\$60 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, for transferring money into the scheme from a UK pension scheme). See the Product Disclosure Statement for the SuperLife UK pension transfer scheme for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

The fees set out above include GST where applicable.

Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$466 (that is 4.66% of her initial \$10,000). Jess paid other charges of \$60. This gives Jess a total return after tax of \$406 for the year.

What does the fund invest in?

Actual investment mix
