

SuperLife workplace savings scheme

Emerging Markets Fund

Fund update for the quarter ended 31 December 2019

This fund update was first made publicly available on 13 February 2020.

What is the purpose of this update?

This document tells you how the Emerging Markets Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Smartshares Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The Emerging Markets Fund is designed to provide a return (after tax, fees and other expenses) that reflects the after-tax return on international share markets of emerging economies.

Total value of the fund:	\$15,311,363
Number of investors in the fund:	1,694
The date the fund started:	26 January 2011

What are the risks of investing?

Risk indicator for the Emerging Markets Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the 'Other Material Information' document on the offer register at www.disclose-register.companiesoffice.govt.nz for further information about the risks of investing in the SuperLife workplace savings scheme.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	6.43%	16.96%
Annual return (after deductions for charges but before tax)	7.22%	18.22%
Market index annual return (reflects no deduction for charges and tax)	8.27%	20.60%

The market index annual return is based on the annual return of the FTSE Emerging Markets All Cap China A Inclusion Index (converted to the New Zealand dollar). Additional information about the market index is available in the 'Other Material Information' document on the offer register at www.disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2019.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Emerging Markets Fund are charged fund charges. In the year to 31 March 2019 these were:

	% per annum of fund's net asset value
Total fund charges	0.63%
Which are made up of:	
Total management and administration charges	0.63%
Including:	
Manager's basic fee	0.45%
Other management and administration charges	0.18%
Other charges	Dollar amount per investor
Administration fee	\$12 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing money and transferring it to a KiwiSaver scheme other than the SuperLife KiwiSaver scheme). See the Product Disclosure Statement for the SuperLife workplace savings scheme for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

GST is included in the fund charges set out above.

Example of how this applies to an investor

Jess had \$10,000 in the fund and did not make any further contributions. At the end of the year, Jess received a return after fund charges were deducted of \$1,696 (that is 16.96% of her initial \$10,000). Jess paid other charges of \$12. This gives Jess a total return after tax of \$1,684 for the year.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.
